TOPIC AND APPLICATION

PHARMACY MANAGEMENT SYSTEM

INTRODUCTION

Pharmacy management system is a software designed for the pharmacies to keep track of products, sales, quantity,etc.

BENEFITS

➤ Track sales and orders.

➤ Access products to add and delete them.

➤ Easy Handling and Interactive.
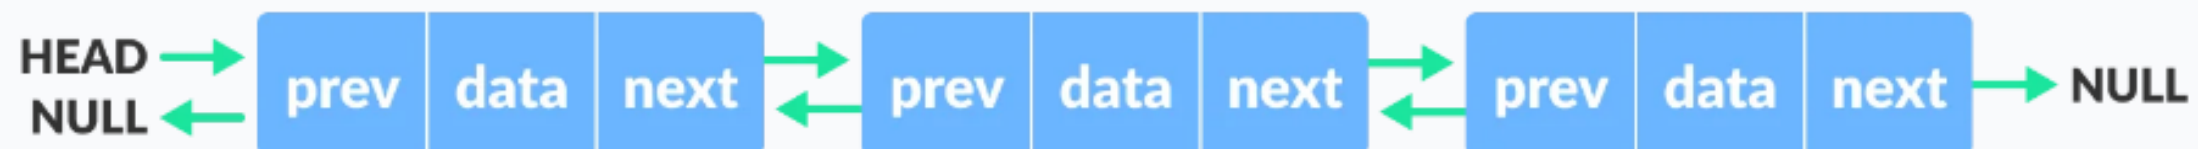

FEATURES:

Doubly Linked List

Representation:

```
struct node{
int data;
struct node* next;
struct node* prev;
};
```

Applications:

1.Add data.
2.Delete data.
3.Display data

Note: All operations
are performed using node.

TRAVERSAL
Unlike singly linked list, it can be traversed in both direction(forward and backward).

INSERTION
We can insert a node in any position quickly according to our choice.

DELETION
It is more effective if pointer to the node to be deleted is given. It can be performed anywhere in the list like insertion.
